DETAILED ACTION

This supplemental Office action is in response to the telephonic interview conducted on 9/20/2005 with Mr. John Coulby. This Office action is reiteration of the previous Office action with the exception of correcting typos in the Office action summary, and to include status of claims 59, and 60.

Claim Objections

Claim 55 is newly objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The specification at Examples 1 at page 59, FGFR2 exon 8 has ESS. However, claim 55 is drawn more than ESS.

Claim Rejections - 35 USC § 112, Withdrawn

The rejection of claims 1-15, 21, 29, 30, and 55-64 under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement is **withdrawn** because applicant argument is persuasive.

The rejection of claims 1-15, 21, 29, 30, 55, and 56 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement is withdrawn in view of the amendment.

Claim Rejections - 35 USC § 102

Claims 57, 58, 61-64 **remain rejected** under 35 U.S.C. 102(b) as being anticipated by Purcell and Martin (J. Virol.,1993, vol. 67, pages 6365-78) as evidenced

Art Unit: 1642

by Damgaard et al., (2002, RNA, vol. 8, pages 1401-1415) and by <u>Section 2. Virology</u> (total 5 pages) of Medical Microbiology (S. Baron, ed) downloaded from url>>cbi.nlm.nih.gov/books on 4/20/2004.

Claims 57, 58, 61-64 are interpreted as drawn to method with only one manipulative active step i.e. introducing into a cell a plurality of RNA polynucleotide sequences consisting essentially of at least one intronic splicing (ISS) in claims 57, and 58, exonic splicing silencer (ESS) in claims 61, and 62, exonic splicing enhancer (ESE) in claims 63 and 64, wherein the introduced polynucleotide sequences compete with at least one endogenous RNA sequence for interacting with the hnRNP A protein or hnRNP A1 protein or hnRNP A protein.

Applicant argues that the product used in the amended claims with the transitional phrase "consisting essentially of" is different from the HIV genome of Purcell and Marin used in the study of infecting HIV-1 virus to lymphocytes or human T-cell lines by contacting the cell lines with HIV-1 virus. This argument has been fully considered but found unpersuasive/ The amended claims 56, 57, 58, 61-64 as currently construed still read on the procedure of infecting HIV-1 virus to lymphocytes or human T-cell lines by contacting said cell lines with HIV-1 virus disclosed in lines 4-5 of abstract, and page 6366, right column, under the heading "Cell culture, transfections, and infections", page 6374 under the heading "Infectivity of splicing mutants of HIV-1" of Purcell and Martin (cited above) because the transitional phrase "consisting essentially of" is interpreted as open (i.e. same scope as "comprising") unless the specification as originally filed defines the scope to be otherwise. As stated before in the previous

Office action, HIV-1 RNA inherently has ESS, and other sequences (as evidenced by Damgaard et al., note abstract, page 1403, Table 1) that hnRNP A1 (species of hnRNP A) binds to. In summary, the product used in the amended base claims still read on the HIV-1 genome, which comprises ESS, ISS, and ESE.

Rejection of all other claims not repeated here is withdrawn because the amended claims are no longer anticipated by the art if record.

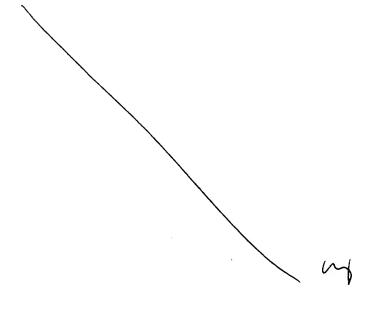

Allowable Subject Matter

Claims 1-6, 9-15, 21, 29, 30, 56, 59, and 60 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MISOOK YU, Ph.D. whose telephone number is 571-272-0839. The examiner can normally be reached on 8 A.M. to 5:30 P.M., every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Siew can be reached on 571-272-0787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
